

Visendo Software announces full support for MS office 2010, SharePoint 2010 with the Fax and Email Suite 10

Visendo Fax and Email Suite can now be fully integrated with MS Office 10 and SharePoint 2010 enabling the small and medium companies that embrace Microsoft Solutions achieve higher productivity, compliance and content security and reduce costs.

Burghausen - 2010-05-18 – Visendo Software (part of **ppedv AG**), today announced full support for Microsoft Office 2010 and Microsoft SharePoint Server 2010, allowing its customers take full advantage of Visendo Email and Fax suite's flexibility and efficiency together with the new Microsoft products.

Today's announcement embraces Visendo's current strategy to fully support small and medium companies that plan to upgrade to Microsoft Office 10 and SharePoint 10: in the context of the ever-growing volume of electronic information, Visendo Solutions will improve the faxing and emailing activity by increased flexibility, a better online vulnerability policy and decreasing associated costs.

"With Visendo Faxing and Email suite, small and medium companies that use Microsoft Office and SharePoint, will be able to achieve the efficiency and flexibility of corporations in terms of security, document management and electronic communications at lower costs", said Cosmin Dumitru, Product Manager & Lead Architect at [ppedv AG](http://ppedv.com).

Platform Support

The integration possibility of Visendo Suite with Office 2010 and SharePoint 2010 support will enable customers to better acknowledge and use the latest industry updates in terms of faxing and emailing. Here are some highlights:

Visendo Fax Server users can now create their fax documents in **Microsoft Office** and send them out as a fax, or save them to **SharePoint** with the added security of keeping the original fax document in a **SharePoint library**.

Fax Server SharePoint Routing enhances now image management: images delivered to SharePoint libraries can now conform to enterprise document policies, security and lifecycle management, providing improved compliance and accessibility.

Corporate search possibility: documents stored as TIFF can now be tagged before being sent to SharePoint so that they can easily be found and located on the server.

Visendo Mailchecker Server and **popConnect** can be fully integrated with Outlook 10 to better assure email deliverability and security.

Visendo and Microsoft Solutions

Being regularly in direct contact with the developers from Microsoft, Visendo Solutions are developed in line with the best development trends. Being part of a Microsoft Gold Certified Company, Visendo Communications Suite follows the best practices and standards suggested by Microsoft professionals.
